## ABOUT

---

With over 4 years of experience specializing in B2B SaaS Startups in front-end and full-stack development—primarily using React.js, TypeScript, JavaScript, and Node.js, Python—I am confident in my ability to add immediate value to your engineering team.

## EXPERIENCE

---

### Senior Software Engineer

July 2025 - March 2026

*Factors.AI*

*Bangalore, India - Remote/Hybrid*

- Contributed to the core React codebase within an Agile/Scrum environment, delivering production-ready features during high-growth cycles.
- Partnered with backend engineers to define API schemas, ensuring seamless data flow and error handling for the platform's marketing attribution engine.
- Technical Stack React.js, JavaScript, TypeScript, Redux/Context API, HighChart, Chart.js, Axios, Ant Design.

### Software Engineer

Dec 2022 – July 25

*Factors.AI*

*Bangalore, India - Remote/Hybrid*

- Improved web application load times by 30 percent through code-splitting, memoization, and optimizing React lifecycle methods for data-intensive visualization tools.
- Collaborated with product and design teams to translate complex Figma wireframes into high-fidelity, responsive React interfaces, ensuring cross-browser compatibility and mobile responsiveness.
- Identified and resolved critical front-end bottlenecks and memory leaks, enhancing the overall stability of the Factors.ai platform for enterprise-level clients.

### Software Engineer Trainee

July 2021 – Nov 2022

*MountBlue Technologies*

*Bangalore, India - Remote*

- Completed a rigorous 4-month Full Stack residency, building 5+ full-scale projects and mastering Javascript ecosystems.
- Developed multiple end-to-end web applications using the MERN stack (MongoDB, Express, React, Node.js), transitioning from basic scripts to complex, scalable architectures.
- Mastered core software engineering principles including Test-Driven Development (TDD), version control with Git, and Agile methodologies through daily standups and peer code reviews.
- Designed responsive and interactive UIs using React.js, HTML5, and CSS3, improving user engagement and performance metrics.

*Software Engineer I - Contract - Factors.AI*

*Nov 2021 - Nov 2022*

- Developed and optimized complex, data-heavy dashboards using React.js and Redux, enabling B2B marketing teams to visualize multi-touch attribution and customer journeys in real-time.
- Engineered reusable UI components using Antd, JavaScript, TypeScript and Tailwind CSS/Styled Components, reducing front-end development time for new feature releases by 20 percent.
- Integrated RESTful APIs to handle large datasets, implementing efficient state management and pagination to maintain seamless performance across high-traffic analytics modules.

## SKILLS

---

- React.js, JavaScript, TypeScript, Redux/Context API, Tailwind CSS, HighChart, Chart.js, Axios, Ant Design, CSS, HTML, JS, Bootstrap
- JavaScript, Typescript, C, C++, Java, Python, Go
- PostgresSql, MongoDB, Git, CI/CD, Docker
- Claude code, Cursor, Github copilot etc

### Chat With Your Docs — Conversational RAG Assistant

Sept 2026

- Built with Streamlit, FAISS, Sentence Transformers, and Gemini.
- A working RAG system that answers questions about a document collection. Upload PDFs or text files, ask questions, get grounded answers with retrievable source chunks.
- **LLM:** gemini-2.5-flash (Google Gemini), **Embeddings:** sentence-transformers/all-MiniLM-L6-v2 (384-dim), **Vector store:** FAISS (CPU, IndexFlatL2), **Chunking:** 500 chars with 100 char overlap, **Retrieval:** Top-k = 5, L2 distance, **Framework:** Streamlit, **PDF parsing:** pdfplumber
- [View Project](#)

### AI Forge — AI Video and Image Generation Platform | *PERN Stack*

Sept 2026

- Developed a full-stack web application using with Pern Stack
- **Frontend:** React (Vite), TypeScript, Tailwind CSS, **Backend:** Express, TypeScript, Node.js, **Auth:** Jwt, **Database:** PostgreSQL + Prisma ORM, **File Upload:** Multer, Dev: tsx, concurrently
- Implement login, signup, Video Generation (text-to-video / image-to-video), Image Generation (prompt + model + style selection), History with live processing polling, File Upload for image-to-video source, Authenticated Routes via JWT
- [View Project](#)

### Social Media App - Instagram(Capston Project - Mountblue) | *PERN Stack*

Sept 2022 – Oct 2022

- Developed a full-stack web application using with Mern Stack
- Used Jwt, Node, Express, Postgresql database for backend, for frontend used React, Redux, Javascript, Typescript, Materialize, Bootstrap
- Implement login, signup, search, profile, follow, unfollow, comment etc features
- Build with 4 members team in collaboration. Divided features equally between all members to work on both part frontend as well as backend development
- [View Project](#)

### E-Passport Using RFID Tag and Fingerprint Scanner | *Java, JSP, Servlet, Bootstrap, MySQL* Aug 2019 – Feb 2020

- Developed a full-stack web application using with Java serving a JSP, Servlet with Bootstrap as the frontend
- Implemented Fingerprint Authentication to identify users
- RFID reader is used to read data from RFID tag
- Used Image Processing and Matching Algorithm for authentication
